Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-2, 6-8, 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No.4836373 to Goldman or US Patent NO. 5084028 to Kennedy et al. or US Patent No.5469964 to Bailey in view of US Patent No.5183156 Bruno or US Patent No.5067223 to Bruno.

Bailey, Kennedy and Goldman all teach a syringe device with a cap holding section for supposing and holding therein a cap, which covered, a needle position at the extreme end of a syringe barrel. Having a plurality of members having thickness corresponding to cap lengths, and being positioned at an extreme end portion of the cap holding section.

However they do not teach a needle separating section for separating the needle from the barrel. Bruno teaches needle-separating sections.

Therefore it would have been obvious to one having ordinary skill in the art to have combined these inventions because needle separating sections are very common in the art and to combined them would allow one device to be carried instead of having to carry multiple devices which the caregiver could potentially forget.

Response to Arguments

2. Applicant's arguments filed 12-3-2003 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1-2, 5-8, 10-11 has been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
